App review request for Rocketbox (app ID 1836367217546891)

Downloaded on October 20, 2026, 4:40 AM PDT

Permission usage

[instagram_business_basic] Tell us how you're using this permission or feature

Business owners connect their Instagram professional account to Rocketbox through Instagram Login. We read the account's user ID, username, profile picture and basic profile details. We need the ID to publish to the right account, and we show the username and picture on the owner's dashboard so they can confirm which account is connected. We don't share this data with anyone.

[instagram_business_basic] Provide a detailed step-by-step video walkthrough of how your app will use this permission or feature so we can confirm it is used correctly and does not violate our policies.

- video

[instagram_business_basic] The instagram_business_basic allows your app to read an Instagram Business account profile's info and media. The allowed usage for this permission is to get basic metadata of an Instagram Business account profile, for example username and ID. You may also use this permission to request analytics insights to improve your app and for marketing or advertising purposes, through the use of aggregated and de-identified or anonymized information (provided such data cannot be re-identified).

If approved, I agree that any data I receive through instagram_business_basic will be used in accordance with the allowed usage.

[whatsapp_business_messaging] Tell us how you're using this permission or feature

Owners interact with Rocketbox by chatting with our WhatsApp Business number. We receive their messages and media, save the media to their private library, and reply in the same chat with onboarding questions, sign-in links and confirmations that we received their media. All messages are one-to-one replies in a chat the owner started, never marketing or bulk messages.

[whatsapp_business_messaging] Provide a detailed step-by-step video walkthrough of how your app will use this permission or feature so we can confirm it is used correctly and does not violate our policies.

- video

[whatsapp_business_messaging] The whatsapp_business_messaging permission allows an app to send WhatsApp messages to a specific phone number, upload and retrieve media from messages, manage and get WhatsApp business profile information, and to register those phone numbers with Meta. The allowed usage for this permission is to create messaging experiences initiated by a customer or a business. You may also use this permission to request analytics insights to improve your app and for marketing or advertising purposes, through the use of aggregated and de-identified or anonymized information (provided such data cannot be re-identified).

If approved, I agree that any data I receive through whatsapp_business_messaging will be used in accordance with the allowed usage.

[instagram_business_content_publish] Tell us how you're using this permission or feature

Owners send photos and videos of their work to Rocketbox over WhatsApp. We turn that media into Instagram posts with captions and publish them to the owner's connected account, so their Instagram stays active without them posting. Every post also appears in the owner's dashboard, where they can remove it.

[instagram_business_content_publish] Provide a detailed step-by-step video walkthrough of how your app will use this permission or feature so we can confirm it is used correctly and does not violate our policies.

- video

[instagram_business_content_publish] The instagram_business_content_publish permission allows an app to create organic feed photo and video posts on behalf of a business user. The allowed usage of this permission is to allow an app to manage the organic content creation process for Instagram (for example, post photos and videos) on behalf of an Instagram business account. You may also use this permission to request analytics insights to improve your app and for marketing or advertising purposes, through the use of aggregated and de-identified or anonymized information (provided such data cannot be re-identified).

If approved, I agree that any data I receive through instagram_business_content_publish will be used in accordance with the allowed usage.

[public_profile] Tell us how you're using this permission or feature

[public_profile] The public_profile permission allows apps to read the Default Public Profile Fields on a User node. The allowed usage for this permission is to authenticate app users and provide them with a personalized in-app experience. This permission is automatically granted to all apps. You may also use this permission to request analytics insights to improve your app and for marketing or advertising purposes, through the use of aggregated and de-identified or anonymized information (provided such data cannot be re-identified).

If approved, I agree that any data I receive through public_profile will be used in accordance with the allowed usage.

[whatsapp_business_management] Tell us how you're using this permission or feature

We use this to manage Rocketbox's own WhatsApp Business Account: webhook subscriptions, callback URLs and phone number settings. We don't access our customers' WhatsApp Business Accounts.

[whatsapp_business_management] Provide a detailed step-by-step video walkthrough of how your app will use this permission or feature so we can confirm it is used correctly and does not violate our policies.

- video

[whatsapp_business_management] The whatsapp_business_management permission allows your app to read and/or manage WhatsApp business assets you own or have been granted access to by other businesses through this permission. These business assets include WhatsApp business accounts, phone numbers, message templates, QR codes and their associated messages, and webhook subscriptions. The allowed usage for this permission is to manage WhatsApp business assets and display WhatsApp Business Account analytics in your customer portal. You may also use this permission to request analytics insights to improve your app and for marketing or advertising purposes, through the use of aggregated and de-identified or anonymized information (provided such data cannot be re-identified).

If approved, I agree that any data I receive through whatsapp_business_management will be used in accordance with the allowed usage.

Data handling

processor-0. Do you have data processors or service providers, including your own companies, that will have access to the Platform Data that you obtain from Meta? Data processors or service providers are separate entities that, on your behalf, process the Platform Data made accessible to you in order to provide you with a service. Please provide the names of any processors that will have access to the Platform Data made accessible to you through the requested permissions and features. “Platform Data” is any data that you receive from Meta (e.g., Meta user ID, email address, profile picture, Meta API user access token, and app secret).

Yes

processor-2. List all data processors or service providers, including your own companies, that will have access to the Platform Data that you obtain from Meta. Please note that Platform Data may include a subset of personal data or personal information that relates to an identified or identifiable person.

- Firecrawl
  - **processor-1a. For which category of services will this data processor process the personal data of users received from Meta? Select all that apply.**
    - IT solutions and services, including cloud storage and processing
  - **processor-1b. List all countries where this data processor will process the personal data of users received from Meta. Include locations from which the data processor will access the data remotely, via the internet. Select all that apply. Many data processors provide this information on**

their corporate website.

responsible-1. Who is the person or entity that will be responsible for all Platform Data Meta shares with you? Please provide the name of the legal entity that will control the data (i.e., determine the purposes and means of processing the data) made available to you by Meta through the requested permissions and/or features. This could be a natural or legal person, a public authority, an agency or other entity. In some regions this is called a data controller.

TADAAA! LTD

responsible-2. Select the country where this person or entity is located.

United Kingdom

requests-3. Have you provided the personal data or personal information of users to public authorities in response to national security requests in the past 12 months? This does not include requests related to search warrants or court orders associated with criminal investigations. Personal data or personal information is any data you receive from Meta that relates to an identified or identifiable person.

No

requests-4. Which of the following policies or processes do you have in place regarding requests from public authorities for the personal data or personal information of users? Check all that apply.

- None of the above.

Web reviewer instructions

Provide instructions for accessing the app so we may complete our review. Explain how to navigate to the app, and provide instructions for testing.

tldr: - open https://rocketbox.plus/sign_in - email: "review@meta.com", password: "review_2026" - connect instagram and whatsapp - send some media via whatsapp - turn into AI video in Library - post it to Instagram in Posts --- Rocketbox (https://rocketbox.plus) runs Instagram marketing for small businesses: owners send photos over WhatsApp, and we publish them to their Instagram professional account. We don't use Facebook Login. Instagram is connected through Instagram Login (instagram_business_basic, instagram_business_content_publish). 1. Go to https://rocketbox.plus/sign_in, enter review@meta.com, click "Login with password instead"

and enter review_2026. 2. WhatsApp: open https://rocketbox.plus/app/whatsapp, then scan the QR code or tap the link and send the prefilled message. The page then shows your number as connected. Send a few photos to the chat: the bot reacts with ☐☐ and they appear under Library > Uploads (whatsapp_business_messaging). 3. Instagram: open https://rocketbox.plus/app/instagram/profile, click "Connect Instagram" and sign in with an Instagram professional account. The page then shows the username, profile picture, bio and follower counts (instagram_business_basic). 4. Publishing: in Library > Uploads, select photos, click "Create post", choose a style and submit. When the post shows "ready" (a few minutes), click "Publish". The Reel appears on the connected Instagram account (instagram_business_content_publish). Alternative sign-up flow (how real customers join, with no email): open https://rocketbox.plus/sign_up and send "START" to our WhatsApp number. The bot guides onboarding and sends a "Connect Instagram" button that signs you in and opens Instagram Login.

Is Facebook Login integrated on this platform?

No

(optional) If payment or membership is required to access the full functionality of this app, provide access codes or test credentials so we can access and review all features on this app. Codes should be active for one year after submission.

Email: review@meta.com. Click "Login with password instead", password: review_2026. No payment required.

(optional) If payment is required to download this app, provide 8–10 gift codes so we can download it from app stores without payment.Codes should be active for one year after submission.Include any codes or test credentials required to access in-app subscriptions, purchases, or features.

(optional) If access to this app or any of its features is limited to users within a specific geographic location or restricted by geo-blocking or geo-fencing, explain the restrictions and provide a list of locations.For example, specify the countries where the app can be accessed.

Include supporting documentation. (Optional) For example, you can upload a screen recording or images that show how to access the app, log in, and how the app uses Meta APIs. You can upload multiple files, maximum 2 GB each. We accept .xls, .xlsx, .csv, .doc, .docx, .pdf, .txt, .jpeg, .jpg, .png, .ppt, .pptx, .mov, .mp4, .zip and .zipx.
